WORK EXPERIENCE

Lead Developer

Logie Inc.

05/2022 - Present

Logie Inc. is a Live Streaming Management & Monetization System for Influencers, Brands, and Online Creators

Jersey City, NJ

- Led a global team of 10+ web developers across diverse languages and cultures
- Developed a Node.js backend server, optimized Prisma queries and mutations, and used AWS CloudWatch for performance monitoring
- Migrated a legacy REST API to GraphQL, adding an automatic playground, documentation, and improving CI/CD pipelines
- Integrated OpenAI to deliver a Virtual Assistant, enhancing content creation and SEO for users
- Deployed services on AWS EC2, configured load balancers for scalability, and optimized performance
- Optimized AWS EC2 and RDS performance by leveraging AWS CloudWatch to monitor logs and identify slow queries and mutations
- Integrated the PA-API, AWS Lambda, and Python to efficiently retrieve and process thousands of product data in real-time
- Deployed and optimized collector servers on Azure VMs, using auto-scaling and load balancing for improved performance
- Hosted a PostgreSQL database on AWS RDS, implementing read replicas and automatic backups for enhanced performance
- Optimized performance with Redis caching for user credentials, permissions, and dashboard summaries, improving scalability

Full Stack Developer

Logie Inc.

04/2021 - 04/2022

Jersey City, NJ

- Developed an MVP React.js app with JWT authentication, an intuitive registration process, and Twilio-based 2FA for enhanced security
- Deployed a web application on AWS Amplify, restructuring it with a modern, mobile-friendly interface using Material UI
- Integrated REST APIs with Node.js, Material-UI, and Express for a seamless, user-friendly interface
- Developed an event-driven Thumbnail Generator using BannerBear API, AWS S3, Webhooks, and Redis for efficient image processing
- Built an event-driven, multi-level feature with Brightdata, Redis Pub/Sub, Cron services, and Webhooks to deliver critical data
- Engineered a multi-level system for admins to charge brands via Stripe and distribute payments through Mercury API

Freelance Web Developer

Self Employed

02/2018 - 03/2021

- Developed and maintained scalable APIs using Python and Node.js, optimizing performance
- Integrated third-party APIs like Stripe (payments) and Google services (OAuth, Maps) to enhance functionality and UX
- Implemented web solutions, enhancing mobile responsiveness with CSS (Flexbox, Grid), Bootstrap, and Tailwind

SKILLS

Programming

- HTML5, CSS, Node.js, Python, Typescript

Frameworks and Libraries

- React.js, Next.js, Express, Fastify, Django, Material UI, Bootstrap

Databases

- SQL, PostgreSQL, Prisma, Redis, Mongoose, MongoDB

Web Services

- REST, SOAP, JSON, GraphQL

Cloud Infrastructure and Services

- EC2, S3, Amplify, RDS, Route 53, SES, Lambda, CloudWatch, Azure

Development Management

- Trello, Slack, CI/CD, Git & Github, Agile
