WORK EXPERIENCE

Lead Developer

Logie Inc.

05/2022 - Present

Logie Inc. is a Live Streaming Management & Monetization System for Influencers, Brands, and Online Creators

Jersey City, NJ

- **Led a global team of 10+ engineers**, coordinating development across multiple time zones, languages, and cultures.
- **Integrated OpenAI to build an AI-powered Virtual Assistant**, improving content creation, SEO workflows, and overall user productivity.
- **Built data processing pipelines** using PA-API, AWS Lambda, and Python to fetch and analyze thousands of product records in real time.
- **Managed PostgreSQL DB on AWS RDS**, adding read replicas, automated backups, and performance optimizations for high-traffic workloads.
- **Upgraded the frontend by integrating Next.js and React Query**, improving routing, SEO, and load times using intelligent client-side caching.
- **Built and optimized a scalable Node.js backend**, improving Prisma queries, adding Redis caching, and using AWS CloudWatch to identify bottlenecks across EC2, RDS, and distributed services.
- **Implemented high-availability infrastructure on AWS and Azure**, deploying microservices on EC2 and Azure VMs with load balancing, auto-scaling, and distributed collector servers.
- **Designed and developed an end-to-end order and billing system**, including invoice generation, Stripe transaction handling, shipment tracking, and a product purchase flow.
- **Migrated a legacy REST API to GraphQL**, adding automatic documentation/playground, improving schema design, and strengthening CI/CD pipelines for faster, safer deployments.

Full Stack Developer

Logie Inc.

04/2021 - 04/2022

Jersey City, NJ

- **Built an MVP React.js app with JWT auth**, an intuitive onboarding flow, and Twilio-based 2FA for enhanced security.
- **Deployed and redesigned the web app on AWS Amplify**, using Material UI, CI/CD with QA env, and preview builds for PR testing.
- **Developed and integrated REST APIs with Node.js and Express**, powering a high-performance, responsive frontend.
- **Engineered an admin billing system** using Stripe and Mercury API for brand charging and automated payouts.
- **Developed an event-driven Thumbnail Generator** using BannerBear, AWS S3, Webhooks, and Redis for efficient image automation.
- **Engineered a multi-level data pipeline using BrightData, Redis Pub/Sub, and Cron**, enabling real-time delivery of high-value, processed data.

Freelance Web Developer

Self Employed

02/2018 - 03/2021

- **Developed and maintained scalable APIs** with Python and Node.js, optimizing performance and reliability.
- **Integrated third-party services** including Stripe (payments) and Google APIs (OAuth, Maps) to enhance functionality and UX.
- **Built responsive, full-stack web solutions** with CSS (Flexbox, Grid), Bootstrap, Tailwind, and cloud integrations for multiple clients.

SKILLS

Programming & Core Tech

- HTML5, CSS, JavaScript, TypeScript, Node.js, Python

Frameworks & Libraries

- React.js, Next.js, Express, Fastify, Django, Material UI, Bootstrap, React Query

Databases & Data Systems

- PostgreSQL, SQL, Prisma, Redis, MongoDB, Mongoose

Cloud, DevOps, & Integrations

- AWS, Azure, Stripe, Twilio, CI/CD, Git/GitHub, Agile, Trello
